

Cloud Infrastructure Specification

Production VPC CIDR: 10.0.0.0/16 spanning three availability zones (us-east-1a/b/c).

Kubernetes cluster recall-prod runs on managed node groups with minimum 3 nodes per zone.

Port 443: HTTPS ingress via AWS Application Load Balancer.

Port 6333: Qdrant vector database (internal only, security group sg-qdrant).

Port 11434: Ollama LLM sidecar (cluster-internal DNS ollama.svc.cluster.local).

RPO target: 15 minutes. RTO target: 60 minutes. Cross-region replica in us-west-2 syncs Qdrant snapshots every 15 minutes.
